

GRN047899 Greenacle Dairy Cattle Nutrition and Sanitation Flier

© Copyright Slavko Pecanac (Greenacle) please read copyright, disclaimer and warranty statement [here](#).

For more information about this and other products please see our [library for additional documentation](#).

Greenacle Dairy Cattle added to poultry water supply provides multiple health and sanitation benefits. Greenacle Dairy Cattle is:

- Pure Ascophyllum nodosum marine algae from the cold, arctic waters off Norway – no additives
- Nutritionally rich - chelated, colloidal, and optimally balanced = BIO-AVAILABLE
- Full of naturally-occurring complex enzymes and pro-biotic compounds = BIO-ACTIVE

Nutrition: our product begins in the cow's stomach and provides the following nutritional benefits:

- Full vitamin and mineral supplementation – only Calcium and salt are required as feed additives when using Bio-complex;
- Better feed conversion rates – 10% improvement in FCR;
- Increased milk yield;
- Increased milk-fat content;
- Lower somatic cell counts;
- Natural buffering - lower PH in the rumen = less laminitis;
- NH₃ transformed to NH₄ in ion-exchange
 - Reduced ammonia in manure;
 - Better respiratory health;
- Increased immunity;
- Nutritional boost supports early-weaning;
- Better overall health – increased fertility + less anti-biotic usage;
- Increased profitability from a **GREEN** alternative.

Dosage:

Liquid: 1 l per 2,500 l water.

Granulate: 1 g per 100 kg body weight/day.

Sanitation: our product continues working on the barn floor. Bio-activity throughout the digestive phase means:

- Reduced Noxious gases – ammonia (NH₃) and methane (CH₄);
- Manure is homogeneous – no crusting – easy to clean, pump;
- NH₃ continues being transformed to NH₄ in ion-exchange (as started in the rumen)
 - Manure can spread immediately as available nitrogen fertilizer without cauterizing crop plants;
 - No respiratory problems (cattle and farm managers);
- Cows are drier, cleaner, healthier.

Usage:

0.2L diluted 1:100 / cubic meter of manure

Our full product line is certified under the European Community which governs organic production, labeling and control of animal and human feedstuffs. All of our products can be sold and used in the eco-systems of agriculture in all member states of the European Community without special permission.
