For more information about this and other products please see our [library for additional documentation](#).

Greenacle Poultry added to poultry water supply provides multiple health and sanitation benefits.

Greenacle Poultry is:

- Pure Ascophyllum nodosum marine algae from the cold, arctic waters off Norway – no additives
- Nutritionally rich - chelated, colloidal, and optimally balanced = BIO-AVAILABLE
- Full of naturally-occurring complex enzymes and pro-biotic compounds = BIO-ACTIVE

Nutrition: our proprietary technology provides full access to the nutritional content in the algae without destroying the fragile molecular structure of the beneficial, bioactive compounds. Greenacle Poultry begins in the birds' digestive tracts and provides the following nutritional benefits:

- 10% increase in Feed Conversion;
- Increased immunity;
- Broilers
 - 10% yield increases, increased musculature;
- Layers:
 - Increased egg size;
 - Higher β -carotene content;
 - Stronger shells = Less breakage /wastage;
- No cannibalism;
- Digestive Tract Activity
 - NH₃ transformed to NH₄ in ion-exchange – reducing ammonia in manure
 - Manure is drier, healthier
 - Beneficial intestinal flora promote nutrient absorption, pro-biotic activity
- Better overall health – growth without chemical and pharmaceutical growth-agents
- Increased profitability from a **GREEN** alternative.

Sanitation: Bio-complex, when provided as a nutritional supplement, provides a complete solution to poultry sanitation problems. Bio-complex means:

- Odor Eradication
 - Reduced noxious gases – Ammonia (NH₃) and Sulfides (H₂S)
 - No respiratory problems
- Manure is drier, easier to clean
- NH₃ transformed to NH₄ in ion-exchange (started early in the digestive tract)
 - Manure can be utilized immediately as available nitrogen fertilizer without cauterizing crop plants
- Birds are drier, cleaner, and healthier.

Dosage:

Liquid: 1 l per 2,500 l of drinking water.

Granulate: 1 g per 100 kg body weight/day.

Our full product line is certified under the European Community high governs organic production, labeling and control of animal and human feedstuffs. All of our products can be sold and used in the eco-systems of agriculture in all member states of the European Community without special permission.
